

Thank you to all the lovely teachers at Rising Stars.

Delan and myself are grateful and appreciate all the care and love he got while he was there in the preschool for two years. He loved going to preschool every day that he would not miss any day even when he was not feeling well. He loved all his teachers and he really enjoyed his time at school. He also made long term friendship with many of his dear friends.

His interest in cooking developed from school Wednesday classes. He really loves helping me cooking at home. He actually knows what the ingredients are in all the recipes that they cook in class.

He helps me in chopping vegetables, kneading dough and measuring flour for cakes. He really loves cooking and pasting. Whenever he goes to his aunty's home whom he loves so much, he would create a wall mural with his art work pictures and drawings and then he would paste and leave it there in their lounge wall. That's like his second home.

When he first joined preschool his eating habits were so bad and poor as he was a very picky and fussy eater. I must thank Andra for her influence that today Delan has learnt to eat everything from cucumbers, broccoli to sushi which he would have never done at home. I am very grateful to the preschool staff and the learning programme.

Delan has flourished and developed both socially and educationally in every way possible and this is all due to the preschool programme and the teachers.

Delan is kind of sad to leave you all and will really miss you all. However, he leaves with so much gained knowledge and skills acquired from the centre to that I am grateful forever,

Once again thank you so much to all the lovely teachers and the management. We love you and will really miss you

Joyti (Happy for Rising Stars to publish this on the centre website too)

A handwritten signature in black ink, appearing to read 'Joyti', written in a cursive style.
